**FEATURES**

The LIC-5431 is a 12 ton class compression  
 tool operated by eco-friendly Li-Ion battery.  
 This tool accommodates 12 ton U-type dies  
 for applying compression fittings to copper  
 aluminum and ACSR conductors widely  
 used in the industry.

Pistol type 12 ton tool makes it easier for  
 working in tight space or in the control box.

The trigger switch and return button are  
 activated by only one hand so that other  
 hand is always free to hold working material.

Electronic circuit board with LED  
 indicates compression status and  
 battery capacity.

The LIC-5431 has electronic memory  
 function to record repair history by  
 connecting optional "ROBO-RW" analyzer.
