FEATURES

The LIC-5510 is an environment friendly Li-Ion battery operated 12 ton class compression tool to accommodate 12 ton U-type dies for applying compression fittings to copper, aluminum and ACSR conductors, widely used in the industry.

Pistol type 12 ton tool made it easier for working in tight space or in the control box.

The trigger switch and return button are activated by only one hand so that other hand is always free to hold working material.

Electronic circuit board with LED indicates compression status and battery capacity.

The LIC-5xxx series tool has electronic memory function to record repair history by connecting optional "ROBO-RW" analyzer.
